Age Range: 3 - 7 years

Grade Level: Preschool - 2

Customer Reviews

I was concerned that my computer savy grandson wouldn't use the flashcards but they were exactly what he needed. The time proven method allowed him to pause and consider long enough to retain. The format is large, colorful and clear to understand. We have invented several games with these card and his school work has improved in both understanding and speed.

I love these flash cards. They are really big; BIGGER than all of the addition flash cards that I have ever seen. I only wish that when I flipped the card over the answer would be on the back and not another problem. Just to show my kid his answer is right!!!!

These cards are just what I wanted. Basic, easy to read, no frills. My daughter has figured out that the problem shown in the small print up in the corner is the one on the back side of the card so now

I can not flip them over right away. These are really good and fill the need perfectly.

I used this as a math center in my kinder classroom & they have held up great. They are on thicker paper so they don't bend that easily.

Does the trick, teaches my child some addition! Good quality paper, doesn't get folded or curled up even with repeated use.

Great for learning and fun for kids. Will highly recommend to anyone looking for gift. Will get again for Xmas gift!
