Customer Reviews

This product is supposed to include a labs code for Cengage brain, instead it gives you a code for certblaster which is worthless. If you're using this for a college class DO NOT BUY IT. It'll cost you another 105 dollars to purchase the lab access from cengagebrain that should have come with the text book.

This book is horribly written. It is a weird because the book before this one is great.

Got me through school. Hear me out, please make more eTextbooks. They really do make life a lot easier for students!
