Flash Cs3: Advanced + Certblaster, Student Manual (ILT)
Synopsis

This ILT series course builds on the fundamentals taught in Flash CS3: Basic. Students will learn how to create vector paths with anchor, curve, and corner points to mask layer content. They will create time-line effects with dynamic and static effects, animated masks, motion-guide layers, and shape and motion tweens. They will use ActionScript code to change a movie clip’s properties. They will write event handler functions to change variable values, create conditional code with if blocks, convert code to functions, nest function calls, move functions into external ActionScript files, add user interface components, apply form components, write scripts to respond to user entries, learn the basics of creating dynamic content, import text and XML content, use XML class to import and manipulate XML content, use Flash Video Encoder to convert DV content to FLV, adjust FLV playback component parameters, write ActionScript to make items appear on the Stage in response to cue points.

Book Information
